3-month U.S. Treasury Bill Index

Consumer Price Index

When it comes to investing for your long-term goals, through history's ups and downs, there's nothing like stocks. This graph shows the growth of \$1 invested in stocks (represented by the Standard & Poor's 500) since 1975 compared to the growth of an equal investment in bonds, cash, and inflation.

Mutual funds are subject to risk and fluctuate in value.

In return for their higher growth potential, stock prices are more volatile than those of bonds or Treasury bills. Unlike stocks and corporate bonds, government bonds and Treasury bills are guaranteed by the U.S. government as to the timely payment of principal and interest if held to maturity.

S&P 500 Index: An unmanaged capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Barclays Capital Government (Long-Term) Index: An index composed of bonds issued by the U.S. government or its agencies which have at least \$1 million outstanding in principal and which have maturities of ten years or longer. Index figures are total return figures calculated monthly.

Barclays Capital Credit Bond Index: Composed of all publicly issued, fixed-rate, nonconvertible, investment-grade corporate debt. Issues are rated at least Baa by Moody's Investors Service or BBB by Standard & Poor's, if unrated by Moody's. Collateralized Mortgage Obligations (CMOs) are not included. Total return comprises price appreciation/depreciation and income as a percentage of the original investment.
