

Huntington International Equity Fund

Morningstar Category:
Foreign Large Blend
 Overall Morningstar Rating:
 ★★★★★

Huntington International Equity Fund is designed to offer investors a diversified portfolio of stocks issued by companies from more than 25 developed countries across Europe, Asia and the Americas. A smaller position in emerging markets may provide added diversification. The manager combines Huntington Asset Advisor's "top down" view on economic conditions and sector selection with a "bottoms up" approach to select strong, attractively priced companies that offer the potential for superior long-term results. Stock selection is based on an analysis of numerous factors that help determine how sustainable the company's current growth trends are and the potential influences that may increase the stock's valuation.

Fund Manager: **Madelynn M. Matlock**, Senior Vice President & Director of International Investments | Over 30 years experience | CFA | MBA, University of Cincinnati

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted-average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics. Ratings are for the Trust class; other classes may have different performance characteristics. For the Overall, 3-, 5- and 10-year periods ended 03/31/2012, the Fund received 4, 3, 4 and 4 stars and was rated among 726, 726, 552 and 316 funds, respectively. ©2012 Morningstar, Inc. ¹ MSCI Europe, Australasia and Far East Index (EAFE) is an unmanaged market capitalization weighted equity index comprising 20 of the 48 countries in the MSCI universe and representing the developed world outside of North America. Each MSCI country index is created separately, then aggregated without change, into regional MSCI indices. EAFE performance data is calculated in U.S. dollars and in local currency. Investments cannot be made in an index.

² Contribution to Return is an approximate measure of the contribution by an individual position to the overall portfolio return of the stated period.

³ The holding percentages are based on net assets at the close of business on 03/31/2012 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes.

⁴ Alpha is the portion of a portfolio's total return that is unique to that portfolio and is independent of movements in its benchmark. Beta is a measure of the volatility of a portfolio relative to its benchmark. Sharpe Ratio is a measure used to determine a portfolio's reward per unit of risk. Standard Deviation is a measure of how far a portfolio's return moves above or below its average. R-Squared is a measure of how closely a portfolio's return correlates to its benchmark.

Total return represents the value of an investment after reinvesting all income and capital gains. Total returns for less than one year are cumulative. Returns shown are pre-tax. To receive after tax performance, please call 800-253-0412. Diversification does not assure a profit nor protect against loss in a declining market.

International investing involves special risks including currency risk, increased volatility of foreign securities, political risks, and differences in auditing and other financial standards. Prices of emerging markets securities can be significantly more volatile than the prices of securities in developed countries and currency risk and political risks are accentuated in emerging markets.
