# INTERMEDIATE GOVERNMENT INCOME FUND

June 30, 2010 | www.huntingtonfunds.com | 1.800.253.0412 |

## Fund Goal and Strategy

The Fund seeks to provide a high level of current income by investing in a combination of U.S. Treasury, government agency, and the highest quality mortgage-backed securities. It is expected that these issues will have an average maturity between three and 10 years, with no single issue having an average life of longer than 15 years.

The Fund is designed for mid- to long-term investors seeking a high level of current income with a moderate level of risk tolerance.

## Average Annual Total Returns

	Quarter	YTD	1-yr	3-yr	5-yr	10-yr	Since Inception

60.0%	19.0%	14.0%	7.0%

Performance data quoted represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

Performance data includes the performance of the FMB Intermediate Government Fund for the period prior to its consolidation with the Huntington Intermediate Government Income Fund on 4/13/98.

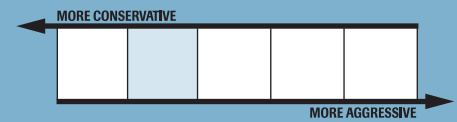

The load returns reflect the 3.75% maximum sales charge for the Class A shares.

Mutual fund performance changes over time and current performance may be lower or higher than what is stated. To obtain current to the most recent month-end performance, call 1-800-253-0412.

The funds are distributed by Unified Financial Securities, Inc. (Member FINRA) a wholly owned subsidiary of Huntington Bancshares, Inc. and an affiliate of Huntington Asset Advisors, Inc. the advisor to the Huntington Funds.

## Risk/Reward Profile

June 30, 2010 | Intermediate Government Income Fund |

### Key Reasons to Invest

- **Opportunity for High Current Income.**
- **Concentration on Government Securities.** The investment concentration of the Fund is in obligations issued or guaranteed by the U.S. government and mortgage-related securities with dollar-weighted average maturities of more than three years, but less than 10 years. Within this range, the advisor can focus on securities which offer the highest level of income and a wide range of intermediate maturities in order to attempt to reduce volatility during periods of interest rate fluctuations.

#### Bill Doughty, Vice President and Senior Portfolio Manager

- More than 30 years of investment management experience
- Bachelor's Degree, Franklin University
- MBA, University of Dayton

Weighted Average Maturity is the average time to maturity of debt securities held in the fund.

The growth of a \$10,000 investment shown is for Class A Shares. Figures reflect the maximum 3.75% sales charge. The Fund offers additional classes of shares whose performance will vary due to differences in charges and expenses.

Fund holdings are guaranteed only as to the payment of principal and interest. Fund shares are not guaranteed and their value will fluctuate with market conditions.

The value of some mortgage-backed securities may be particularly sensitive to changes in prevailing interest rates, and although the securities are generally supported by some form of government or private insurance, there is no assurance that private guarantors or insurers will meet their obligations.

Lipper figures represent the average total returns reported by all mutual funds designated by Lipper Inc. as falling into the respective categories indicated. They do not reflect sales charges.

The Barclays Capital Intermediate Government Credit Index is an unmanaged index and is a market value weighted performance benchmark for government and corporate fixed-rate debt issues with maturities between one and 10 years. Investments cannot be made in an index. Total return represents the value of an investment after reinvesting all income and capital gains. Total returns for less than one year are cumulative. The 30-day SEC yield is calculated by dividing the net investment income per share for the 30 days ended on the date of calculation by the maximum offering price per share on that date. The figure is compounded and annualized.

Returns shown are pre-tax. To receive after-tax performance, please call 1-800-253-0412.

This information must be preceded or accompanied by a current prospectus or summary prospectus. Please read the prospectus or summary prospectus carefully before investing or sending money.

The holding percentages are based on net assets at the close of business on 06/30/10 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes.

Credit ratings pertain only to the securities in the portfolio and do not protect fund shares against market risk.

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

Duration is a measure of a security's price sensitivity to changes in interest rates. Securities with longer durations are more sensitive to changes in interest rates than securities of shorter durations.
