

			HIGH MEDIUM LOW	QUALITY

SHORT/INTERMEDIATE FIXED INCOME SECURITIES FUND

June 30, 2010 | www.huntingtonfunds.com | 1.800.253.0412 |

Fund Goal and Strategy

The Fund seeks to achieve current income by investing in fixed income securities with a maximum maturity for individual issues of five years or less at the time of purchase and a dollar-weighted average portfolio maturity of more than two, but less than five years.

The Fund is designed for short-term investors seeking high current income with low to moderate volatility.

15.0%	61.0%	14.0%	10.0%

Performance data quoted represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

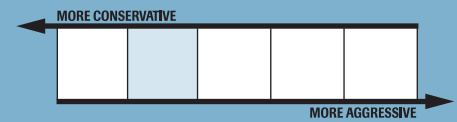

The load returns reflect the 1.50% maximum sales charge for the Class A shares.

Mutual fund performance changes over time and current performance may be lower or higher than what is stated. To obtain current to the most recent month-end performance, call 1-800-253-0412.

The funds are distributed by Unified Financial Securities, Inc. (Member FINRA) a wholly owned subsidiary of Huntington Bancshares, Inc. and an affiliate of Huntington Asset Advisors, Inc. the advisor to the Huntington Funds.

Risk/Reward Profile

June 30, 2010 | Short/Intermediate Fixed Income Securities Fund |

Key Reasons to Invest

- **Opportunity for High Current Income.**
- **Invests in High Quality Securities with Short-Term Maturities.** The Fund invests in investment grade quality corporate bonds, U.S. Treasuries and government agencies in order to help investors increase their income potential without assuming a great deal of credit risk.
- **A Rigorous Selection Process.** When selecting holdings for the Fund, the advisor considers various economic factors, Federal Reserve policies, interest rate trends, spreads between different types of fixed income securities and the credit quality of existing holdings.

- More than 30 years of investment management experience
- Bachelor's Degree, Franklin University
- MBA, University of Dayton

Weighted Average Maturity is the average time to maturity of debt securities held in the fund.

The growth of a \$10,000 investment shown is for Class A Shares. Figures reflect the maximum 1.50% sales charge. The Fund offers additional classes of shares whose performance will vary due to differences in charges and expenses.

Lipper figures represent the average total returns reported by all mutual funds designated by Lipper Inc. as falling into the respective categories indicated. They do not reflect sales charges.

The BofA Merrill Lynch 1-5 Year Government Credit Index is an unmanaged index trading short-term U.S. Government securities and short-term domestic investment-grade corporate bonds with maturities between 1 and 4.99 years. Investments cannot be made in an index.

Total return represents the value of an investment after reinvesting all income and capital gains. Total returns for less than one year are cumulative.

The 30-day SEC yield is calculated by dividing the net investment income per share for the 30 days ended on the date of calculation by the maximum offering price per share on that date. The figure is compounded and annualized.

Returns shown are pre-tax. To receive after-tax performance, please call 1-800-253-0412.

Duration is a measure of a security's price sensitivity to changes in interest rates. Securities with longer durations are more sensitive to changes in interest rates than securities of shorter durations.

This information must be preceded or accompanied by a current prospectus or summary prospectus. Please read the prospectus or summary prospectus carefully before investing or sending money.

Credit ratings pertain only to the securities in the portfolio and do not protect fund shares against market risk.

The holding percentages are based on net assets at the close of business on 06/30/10 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes.

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

The growth of a \$10,000 investment shown is for Trust Shares. It assumes the reinvestment of all distributions. Performance for other classes will vary due to differences in charges and expenses.
